DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 23 – 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 23 states, in line 3, "...having a non-uniform density of such energy states...". This is not understood. Does this mean that the energy states of the quantum well are not uniformly spaced in energy? Correction or explanation is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 23 – 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Luryi et al.
6. With respect to claims 23 and 24, Luryi et al. show a method of forming a resonant tunneling device with a capacitively coupled gate (see cover Figure) where the AlGaAs tunnel barriers have less than the quantum resistance, the energy levels in the well (GaAs) are typical well levels and the energy levels will be shifted by the application of a voltage to the gate.
7. With respect to claim 25, a current is passed through the device from terminal V_s to V_d .

Drawings

8. The drawings are not objected to by the Examiner.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A Wille whose telephone number is (703) 308-4949. The examiner can normally be reached on M-F (6:15-3:45).
